## SKILLS

---

**Most comfortable:** JavaScript (ES6), React, Gatsbyjs, Vue, Git, HTML5, CSS3, Google Analytics, Google Tag Manager, Contentful, Firebase, Bootstrap, jQuery, Gulp.js, Grunt, Material-UI, styled components, Trello, JIRA, AEM HTL

**Need more work:** GraphQL, Node.js, Python, Bash, Heroku, New Relic, EyeQuant, MQTT, ESP8266, sensors.

**Generalist level:** Java, PHP, Sentient Ascend, MongoDB, Puppeteer, 3D Modeling, Texturing, Video editing and many more.

## PROFESSIONAL EXPERIENCE

---

**F-Secure**

Jul 2016 – present

### *Web Developer*

- Migrate and redesign delivery platforms: from legacy to #JAMstack with Netlify and React (Gatsby) for campaign landing pages
- Migrate [www.f-secure.com](http://www.f-secure.com) from Liferay to AEM CMS
- Design, implement and deploy new GDPR compliant cookie consent
- Improve landing page building processes
- Implement various performance strategies: lazy loaded images, on demand video loading, managing script and dependencies
- Deliver internal workshops and share knowledge on React, ES6, Gatsby and other topics
- Create tooling to simplify and automate tasks away (Python, Node.js)
- Architect legacy JavaScript bundles for performance and simplicity

**F-Secure**

Jan 2016 – Jun 2016

### *Junior Web Developer*

- Researched and extended upon a static site generation system
- Created components and templates
- Created a build system for front end resources

**Web Developer Trainee**

- *Developed a product selector app*

**EDUCATION**

---

Nov 2017 – Jun 2018

Google Developer Challenge Scholarship – Udacity Mobile  
Web Specialist Nanodegree

Sep 2013 – Sep 2016

**Bachelor of Engineering**  
Metropolia University of Applied Sciences  
Degree Program: Information Technology**HOBBIES**

---

**FPV drone racing**

I love flying and building FPV drones.

**Blog**I blog about said drones (and more) for ~ 2k monthly active users on my [own blog](#) built with Gatsby.**Smart home automation**

My smart home runs on open source software called Home Assistant. That was a nice gateway into microcontrollers, sensors and other IoT stuff.

**Twitch**[I stream](#) web dev sessions on twitch about once a week.**Events**

I go to events like Junction Hackathon (2015-2018), HelsinkiJS and React Helsinki.

**Writing a book**

I have started preparing to participate in #NaNoWriMo in November 2019 when I will write a book.
